

PRESENTS

ZBLUDZA, POLAND

'Technopia Tours', the invention of Kim Donaldson, takes the form of a tour company and is modelled on the idea of the travelling sideshow to create a vehicle for performative forms and collaborations. Here the 'wonders' and 'spectacles' of the antipodean world coalesce to create a new imaginative space. With each shift in location a new construction emerges where fact and fiction, now and the future merge and are contingent on contextual detachment. Through sound, video, performance, built environments and elements incorporating painting and drawing this mobile platform takes its passengers on adventures into strange new lands.

The 'Technopia Tours - Zbludza' dinner is a collaboration between Malgorzata Sidor, artist and organiser of '*fabs*' and Kim Donaldson, curator and visual artist from Melbourne, Australia, for 'We are here'. You are invited to this meeting and the 'Technopia Tours' dinner on 22 September 2012 beginning at 7.30pm.
